#### 5.2. Special hazards arising from the substance or mixture

Not flammable, but combustible. Hazardous fumes are formed in fire conditions. Nitrous gases/ Carbon monoxide and carbon dioxide.

#### 5.3. Advice for firefighters

If there is a risk of exposure to vapour and flue gases, a self-contained breathing apparatus must be worn.

**Other Information:** Notify proper authorities in case of contamination of soil or aquatic environment or discharge to drains.

### SECTION 6: Accidental release measures

#### 6.1. Personal precautions, protective equipment and emergency procedures

**For non-emergency personnel:** Keep unnecessary people away, isolate hazard area and deny entry. Wear suitable protective clothing. Wear safety goggles if there is a risk of eye splash.

#### 6.2. Environmental precautions

Prevent spillage from entering drains and/or surface water. Notify proper authorities in case of contamination of soil or aquatic environment or discharge to drains.

#### 6.3. Methods and material for containment and cleaning up

Contain and absorb spill with sand or other absorbent material and transfer to suitable waste containers.

Keep in tightly closed original packaging. Store in a dry, cool, well-ventilated area.

#### 7.3. Specific end use(s)

Polymerise together with part A during heat emission. The product is corrosive. May cause an allergic skin reaction.

### SECTION 8: Exposure controls/personal protection

#### 8.1. Control parameters

**Occupational exposure limit:** Contains no substances subject to reporting requirements

**Legal basis:** None known.

#### 8.2. Exposure controls

**Personal protective equipment, eye/face protection:** Wear safety goggles/face protection. Eye protection must conform to EN 166.

**Personal protective equipment, skin protection:** Wear suitable protective clothing.

**Personal protective equipment, hand protection:** Wear gloves. Type of material: Nitrile rubber/ Butyl rubber. Penetration time of glove material: 3 hours. We have reduced the penetration time by a factor of 3, when the test standard EN 374-3 is done at 23°C, while the temperature inside the glove is approx. 35°C. In addition, the elastic material extends during use, thereby glove thickness and penetration time is reduced. Recommended thickness of the glove is  $\geq 0.4$  mm. Selection of the suitable gloves does not only depend on the material, but also on quality and these will vary between manufacturers.

**Personal protective equipment, respiratory protection:** In case of insufficient ventilation, wear respiratory protective equipment. Filter type: A

**Other Information:** Wash hands before breaks, before using restroom facilities, and at the end of work. Take off contaminated clothing and wash before reuse.
